Target Users: General consumers, music enthusiasts, podcast listeners, families, students, and content creators

https://drive.google.com/file/d/1dJ_wSvT1VzNqCHmicxF1xpmqrcXaINyu/view?usp=sharing What is TuneHive?

TuneHive is a next-generation music and podcast streaming platform designed to deliver a personalized and seamless listening experience. With millions of tracks, expertly curated playlists, algorithmic recommendations, and a growing podcast library, TuneHive enables users to discover, enjoy, and share audio content across all devices.

TuneHive is available on mobile, desktop, web, smart TVs, smart speakers, and car systems — making it accessible wherever and whenever users want to listen.

Key Features:

- **Cross-Platform Streaming:** Access TuneHive via Android, iOS, Web, Smart TVs, CarPlay, and more.
- **Personalized Recommendations:** Discover new music using AI-powered suggestions based on listening behavior.
- **Offline Listening:** Premium users can download songs and podcasts for offline access.
- **Multi-Format Audio Support:** From standard 128 kbps streams to high-fidelity audio and lossless (HiFi) formats.
- **Curated & User-Generated Playlists:** Enjoy editorial playlists or create your own to match any mood or occasion.
- **Podcast Hub:** Thousands of podcasts across genres including true crime, comedy, self-help, and business.
